

# TOWN OF WHITE SPRINGS WATER TREATMENT DEPARTMENT

## HYDRANT FLUSHING

The Town of White Springs will begin its routine fire hydrant maintenance and flushing of water mains during **April 14, 2026 through April 16, 2026** throughout the town.

Some discoloration of water or loss of water pressure may occur to our customers before or during this process, in the event of discoloration occurring, we advise running cold tap water until the water is clear. The discoloration should clear up as we move from your area. Please refrain from washing clothes until your water runs clear.

This operation allows an opportunity to check the function of all the town's hydrants and is necessary to flush out water mains to provide the best water quality year-round to our residents.

If any residents experience discoloration during this time, please notify the Town Hall at (386) 397-2310.

Thank you for your cooperation and patience during this time.
